

GEIER®

## Tunnel sprayer G30UZ, for 3 rows

### Characteristics:

- Blowing group of only 480 mm.
- High air performance, with little power requirement.
- Optimal distribution of the air over the whole height, drift reduction.
- Blower and jets are switched on electrically and parallel.
- Automatical filter washing.
- The blower has a low weight, light construction of coated aluminium and stainless steel.
- 20 % of the output quantity is recycled.
